

Stanley Chen

Full Stack Software Developer

dannyschien@gmail.com | (678) 559 -7015 | Atlanta, GA | github.com/DannyShien | linkedin.com/in/stanley-chen

I'm always looking to progress in my life and coding happens to be the next chapter for me. I've worked most of my life dealing with customer satisfaction and I've learned to use that concept in helping me strive to be better at whatever I'm doing. I believe that my work ethics, ability to adapt, teamwork capabilities and even leadership skills will make me an asset to any team.

SKILLS: Software Developer | Customer Service | Communication | Bilingual: English, Mandarin

TECHNOLOGY: JavaScript | Node.js | Express.js | Ajax | HTML | CSS | React | Redux | PostgreSQL | Bootstrap | Python | Amazon Web Services

RECENT PROJECT

GEOMINDR | geomindr.com | [GitHub](#)

November 2018

- A reminder application that allows users to set reminders and store geographical location.
- Built using JavaScript, Node.js, Express, PostgreSQL, HTML and CSS.
- Enables use of Twilio number and IFTTT for mobile.
- Showcase creating data-base, queries, creating paths for displaying content from data-base.

AEROL PLANE | [GitHub](#)

October 2018

- Web application that uses a flight tracker API to track en route flights and displays flight information.
- Built with JavaScript, Ajax, HTML, CSS
- Showcase API calls with promise chains to have content displayed on browser.

WEATHER APP | [GitHub](#)

January 2019

- Simple 'front-end' weather app pulling from a weather API.
- Capable of searching for current temperature and forecast by searching for city.
- Built with React.

BRO'OCK |

January 2019

- *BR'OCK* was built with React, React Router, Node, Express, PostgreSQL, JavaScript/ES6, CSS3, and HTML5.
- A full-stack React/Node web app that combines alarm clock functions with brain-training flash cards.

PROFESSIONAL EXPERIENCE

GWINNET PLACE HONDA – Sales and Leasing Consultant

August 2014 – March 2017

- Worked with customers directly and indirectly to identify their ideal vehicle that suit their needs as well as price range.
- Maintained product knowledge of all models and different trims to better assist with custom vehicle needs.
- Collaborated with different department members to review monthly sale's goals.
